Professional Profile

I'm a designer transitioning into UX/UI with a background in Interior Architecture and strong focus on usability, flow, and human-centered problem solving. My experience in spatial design shaped my ability to think in systems and translate complex structures into clear, intuitive solutions. I apply this approach to digital products through UX research, wireframing, prototyping, and visual design, as demonstrated in my portfolio projects.

UX Projects

Lite Bite Subs - Mobile App

07/2024 - 10/2024

UX/UI Designer / Self-initiated nutrition calculator app

- Developed the full concept to provide fast and clear nutrition info in a sandwich shop context.
- Created the brand identity, visual system, and reusable UI components to ensure consistency.
- Designed user flows, basic information architecture and wireframes, and built high-fidelity mobile UI screens in Figma.
- Ran small usability checks to compare navigation and wording options, using feedback to refine the final flow.

Unika Floor Plans - Architectural Plan Website

01/2023 - 11/2024

Founder & Designer

- Designed and built a service website for real estate professionals, focusing on clarity, structure, and ease of use.
 - Planned information architecture and UI layouts to help users quickly understand the service and place orders.
 - Iteratively improved the website based on client questions and workflow needs, refining usability over time.
